

Handmade Quality from Austria

## DEAR CUSTOMERS,

**30 years ago** the foundation stones of the Schwaiger company were laid. In 1986, Johann Schwaiger started off in a small office in his home town of Vomperbach, from which he sold woodworking machines and tools. He drove across the country from one company to the next personally presenting the latest technical innovations to joiners and carpenters. The success that he achieved in the first three years led to him taking on the representation of Hoffmann machine construction for Austria, and in 1990 he moved into the market of selling new and used woodworking machinery and tools.

In 1994 the land where the current premises in Schwaz is located, was purchased. The construction of a 2000m<sup>2</sup> office and warehouse was carried out in 1996. At the turn of the millennium, the company was expanded further with the addition of a 1200m<sup>2</sup> warehouse. In 2001 the acquisition of a long-term tooling supplier including patents and inventions that have revolutionised the woodworking industry (panel lifters, door lifters, edge clamps, mitre clamps) was completed.

In 2010 a new strategical sales direction was decided, where only trade was to be supplied.

## FRIENDS AND PARTNERS

Schwaiger prides itself as a manufacturer and wholesale supplier with high quality requirements for carefully selected products.

With stable growth and continuous expansion of the dealer network, the family company has grown into a mid-sized company, with business interests both nationally and internationally. The person responsible for export operations is Carlos Schwaiger, who became Managing Director in 2015 and often visits international exhibitions such as LIGNA in Hannover. Together with his sister and employees, he will continue to run the company with the same motivation and effort displayed by his father, Johann Schwaiger over 30 years ago. Long-term contacts with leading retail partners and suppliers on the international stage has made it possible to produce the right tooling for every requirement, that is demanded from our customers, in both small and large quantities.

The Schwaiger company has a long tradition of quality and service. High quality customer service and uncompromising service availability are a major part of the Schwaiger company culture, which is why the company motto remains to this day:

***“Success is the driving force behind our company, quality our focus, delighted customers our goal”.***

## PATENTED-PANEL CARRIER

The **material and panel carrier** is an indispensable tool for every professional workshop.

The self-adjusting clamping system guarantees slip-resistance across the full clamping range.

Cumbersome materials such as wood, metal (non-lubricated), glass panels and windows can be carried safely, comfortably and with ease.

**THE ORIGINAL** – patented, proven, since 1989.

Art.No.: PWE0002

## COMFORT LIFT

The self-adjusting system makes it possible to have an adjustable carrying height, which is quick and simple to set and guarantees effortless carrying of materials.

Safe carrying and lifting of materials even when at an angle. Optimal support, problem free use on sensitive surfaces and the 'U-shape' design also makes it possible to pull panels out from a panel rack using the front edge.

With the lightweight and ergonomically designed comfort handle, you can carry materials such as:

**Wood, non-lubricated metal, synthetic materials, plaster board,** composite mineral boards and much more, safely and with ease.

Art.No.: PWE0093

## TRAGFIX-PANEL CARRIER

**In use for over 30 years!**

The tried and tested, lightweight and handy tool for simple, damage free lifting and carrying of panels of all types. Available in 2 different designs!

Robust, galvanised steel bars with 3 rubber coated handles, which ensure that no damage can be caused to the panels whilst being transported. Replacement rubber covers are also available.

Art.No.: PWE0086

## UNIVERSAL PANEL CARRIER

**The UNIVERSAL panel carrier** is another High-Tech product from the Schwaiger company.

It is characterised by its particularly high load capacity (welded steel frame) despite its extremely low weight, wide range of material types that it can be used for (plywood, solid wood, synthetic material, plaster board etc.), the ergonomically designed rubber handle, the new "U" shape (which makes it easy to remove panels from a panel rack horizontally), and the easy to handle shape and user friendly design.

Art.No.: PWE0091

## EDGE CLAMPS

**Edge clamps** can be used in every situation, where normal clamps simply cannot get the grip and where time-saving work is required.

The moveable clamping jaws with material protecting and slip-free rubber covers keep their grip on all types of surfaces, even on laminated panels.

This makes it possible to clamp all types of edges without any problems. Without the risk of causing damage to surfaces; cabinets, edges, frames and much more can be glued with ease.

Art.No.: PWE0072 / PWE0071

## UNIVERSAL-CLAMP

The **UNIVERSAL clamp** enables a flexible and at the same time simple usability for even the most difficult of fixing positions.

There is hardly a problem that cannot be overcome with our clamping tools.

There are virtually no problem situations in furniture production that our clamping tools cannot overcome.

Cabinets, edges, frames and much more can be glued with ease without the risk of damage being caused to the surface. Mitres and angles can be positioned next to each other and connected exactly.

Art.No.: PWE0024 / PWE0001

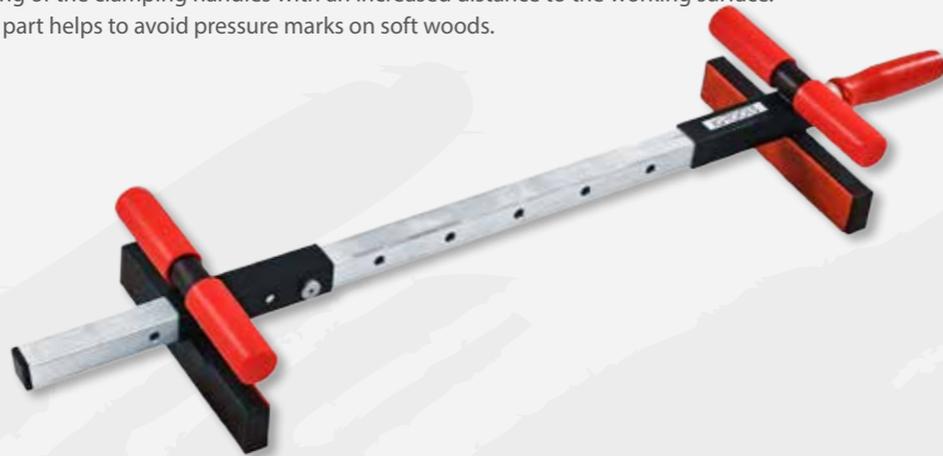

## CABINET CLAMP TOP

The **cabinet clamp TOP**, is a clamping tool with which frames and cabinets can be fixed in place precisely for mounting. Our cabinet clamps are available in various different lengths and can be extended by an additional 1m. The extension can be screwed on in no time, locked in place with bolts and is ready for use.

With the cabinet clamp TOP, you can clamp widths of between 115 and 2,400 mm with both round and flat clamping jaws.

Improved handling of the clamping handles with an increased distance to the working surface. The flat pressing part helps to avoid pressure marks on soft woods.

## CABINET CLAMP

The **cabinet clamp** is available in four different lengths and is a universally applicable clamping tool for furniture manufacturers and joiners.

A cabinet clamp comes in particularly useful, especially when you are making a cabinet for a kitchen or an office or for a living room/bedroom cupboard.

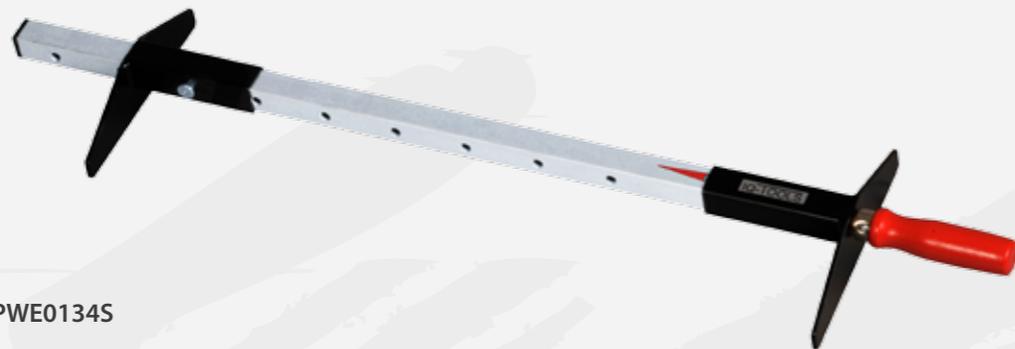

Rounded, specially coated clamping jaws avoid causing clamping marks on the cabinet.

## BOARD CLAMP

The **Board Clamp** is an important support clamp when laying terrace flooring. With just a couple of simple steps, it makes it possible to rationalise your working method. Standard length 700mm, also available in other lengths on request.

Various distance spacers which are compatible with the clamp are also available.

Art.No.: PWE0134S

## BOARD TIGHTENER-FLOOR CLAMP

The Board Tightener is one of our own inventions and produced by us. It provides an innovative solution even for experienced floorers. The laying of materials such as tongue and groove connections, floorboards and decking etc. can be done quicker and more accurately than conventional methods.

**PATENT PROTECTED!**

Art.No.: PWE0017

## DOOR LIFTER 120 KG

With the **door lifter** it is easy to lift doors on and off their hinges.

For mounting, adjustment and maintenance – even very heavy doors – can be installed and removed by one person with ease. Made from robust, nickel-plated metal, designed for smooth lifting, pivoting and lowering all using a foot pedal.

Art.No.: PWE0011

## DOOR LIFTER 200 KG

Guaranteed easy and safe lifting of doors, cupboards, display cases and containers.

The rotatable shovel makes it easier to swivel doors sideways (especially when there are 3 hinges). Optimum power transfer of 1.7:1 -> allowing even lighter operators to be able to lift heavy objects with ease.

Art.No.: PWE0011A

## PANEL PULLER

With simple and quick attachment, the panel puller makes it possible to process solid wood walls, rafters, roof panels etc.

Advantages of the panel puller: low damage caused to the wood, easy handling and it can be attached in every position.

**NEW addition:** Ratchet with ergonomic PVC grip.

Art.No.: PWE0013PN

## UNIVERSAL BEAM TIGHTENER

The Schwaiger nickel-plated Universal Beam Tightener is of technically high quality design and has been in use for over 25 years. Hooks made from forged steel with adjustable ratchet positions, for the powerful pulling, tightening and pressing of rafters, purlins etc. An indispensable tool for the modern carpenter. Threaded spindles from 16x4 trapezoidal thread.

A strap brace tensioner is also available as an accessory, which together with a beam tightener, becomes a tightener for all dimensions.

**NEW addition:** Ratchet with ergonomic PVC grip.

Art.No.: PWE0013N

## S-DRILL JIG SET

The **S-drill jig** makes it possible to carry out precise and quick drilling for furniture knobs, door handles, as well as all other holes in doors and cabinet doors. The very simple to use tool, enables the quick and accurate drilling of holes for furniture knobs and handles.

The distance between the holes can be adjusted as required, between 64 and 1,400 mm and the distance from the edge of the panel can also be adjusted between 15 and 200 mm.

Art.No.: PWE0053

## MAXIFIX MITRE CLAMP

The **mitre clamp** is a tried and tested solution when it comes to the quick and easy joining of frames, racks, door frames, cornices, corner benches etc. Due to the use of high quality materials, large clamping force despite its relative small size is not a problem.

Simply mark the holes on the hidden side of the workpiece, drill, glue, position the clamp, tighten – and finished!

Art.No.: PWE0012

## COVER MASTER

The cover master is the ideal solution for scribing on fitting strips and cover panels. With the clamping elements (3pcs. included), the fitting strip (cover panel) can be clamped to the fixed positioned cabinet and marked using the parallel scribe (also included).

Art.No.: PWE0033

## PRESS CLEANER – “PUTZ-BOY”

The **Press Cleaner** is a great help in cleaning the heating platen of hydraulic veneer presses.

2 wooden pressure plates covered with durable synthetic fibres heat-resistant up to approx. 100 degrees, 2 double sleeves spring mounted, steel chain. Robust metal construction with dual guides.

Art.No.: PWE0034

## SAFETY BAR SET

**Safety bar set suitable for existing spindle fences e.g. Panhans, Oertli etc. consists of:**

- 2 grooving profile bars
- 3 260 x 3 mm safety bars
- 2 260 x 6 mm safety bars
- 1 300 x 3 mm safety bars
- 1 300 x 6 mm safety bars
- 1 wooden throat plate
- 2 wooden splitters
- 4 steel sliding blocks
- 16 mm Allen screw screwdriver

Art.No.: PWE0140

## BIO-CONNECT

The **"BIO-CONNECT"** ridge dowels are an alternative joining solution instead of the standard screwing or gluing of workpieces. Ideally suited for wooden furniture that needs to be quickly and simply assembled and disassembled such as bed frames.

Our ridge dowels are made from solid beech wood and are available in 3 different sizes. (16, 20 and 25 mm)

## SEAL ROLLER

Simple and quick installation of seals into a window or door frame.

The seal can be placed in position and then rolled over using the seal roller. This saves you time and energy, the seal can be placed in the right position and remains in place. Roller diameter 35 x 3 mm – Solid wooden handle.

Art.No.: PET0170

## PARALLEL SCRIBE

A practical tool for the exact scribing and transferring of irregularities in walls and cut-outs for cover panels, skirting boards, worktops, covers etc.

Made from durable plastic with a small clamping wheel to lock the angle in place. Available loose or in blister packaging.

Art.No.: PWE0123

## EXPRESS GLUE SPRAY

**Standard glue spray** with an approx. 70 mm long, removable screw spraying nozzle.

The spray canister and the nozzle are both made from polyethylene and for that reason is also suitable to be used for solvent based adhesives as well as white glues. A clean solution for professional work.

Art.No.: PWE0035 / PWE0036

## GLUE STORAGE CONTAINER "TS-BOY"

Practical storage container complete with brush for the application of various different solvents. Available in 3 different sizes.

**ADVANTAGES:** Clean and convenient removal, contents remain liquid, high chemical durability, ergonomically designed shape, robust plastic material, high level of functionality with ergonomic design.

Art.No.: PWE0020 / PWE0021 / PWE0022

## S-GLUE ROLLER

The **S-Glue roller** is a robust and incredibly handy glue applicator for glues and adhesives.

It enables a quick and complete, uniform application of glues and adhesives.

**Available in 3 different sizes -> 72, 150 and 180mm**

Art.No.: PWE0046

## GLUE CONTAINER

**Glue container** with approx. 8kg capacity. The glue is stored in the inner PVC container.

The container once filled with compressed air, allows the glue to be applied using the spray gun.

Filling the container up completely with air, is enough to be able to use the full (8kg) capacity. There is a wide selection of various different glue nozzles available for the spray gun (spraying nozzle).

Art.No.: PWE0060

# Manufacturer and wholesale supplier

## Your partner for small workshops, business and industry

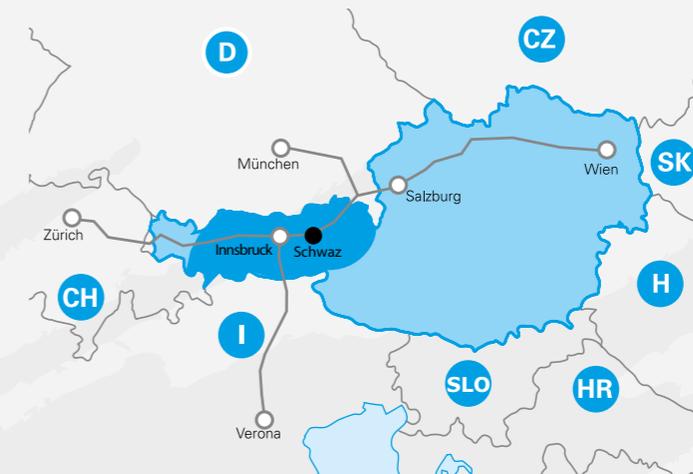

For many years, we, the committed and dedicated Schwaiger team, have strived to offer the best possible customer service to both big companies and smaller workshops, acting as a competent partner in all areas of tooling supply. In a time where larger companies are setting the standards, it is clear that key customer service factors such as personal advice and professional support are becoming rapidly forgotten.

Through a reputable service in accordance with a consistent quality philosophy, we can guarantee you, that today and in the

future you will receive products and services that will meet your requirements and enable you to carry out high quality work and strengthen your position in the market.

Ever since the Schwaiger company was founded in 1986, our company has succeeded in growing solidly and steadily through foresight and high quality service level.

With the acquisition of a long standing supplier we have set yet another milestone in improving the services that we are able to offer you as a customer.
